

ABSTRACT OF THE DISCLOSURE

A flexible disk drive includes a case and a disk holder provided in the case. A flexible disk
5 is mounted on the disk holder. A part of the disk holder abuts against an inner face of the case. Preferably, The part of the disk holder is a tip end portion of the disk holder. The tip end portion of
10 the disk holder is bent in a slanted direction so as to enlarge an inlet of the diskholder for the flexible disk to be inserted.
